**** ClaraWell Debuts AI-Powered Health Screening Platform at Web Summit 2025****

*Now live with tools for sleep apnea and ADHD, ClaraWell introduces a new category of patient-first, AI-powered health support. *

VANCOUVER, CANADA – May 27, 2025 – Web Summit 2025 marks the public debut of ClaraWell™, a personalized AI health assistant created to simplify early risk detection across complex medical conditions. Launching with two public-facing screeners — ApneaRisk.com and ADHDRisk.com — ClaraWell introduces a growing platform of micro-screeners designed for clarity, accessibility, and daily use.

Developed by Godly Labs Inc., an AI health technology company with roots in Canada and operations across North America, ClaraWell™ reflects a modern approach to healthcare interaction. The platform offers guided, focused tools that help users reflect on their health, receive structured feedback, and take meaningful next steps, all within an interface built for real-world use on mobile and desktop.

“Technology moves fast; Healthcare moves slow. We are going to meet people in the middle with ClaraWell™,” said Eric Blum, founder of Godly Labs Inc. “We are starting by meeting people where they are, through specific health categories where early answers matter. Our goal is to earn trust over time through clarity, expertise, and consistent support.”

ClaraWell™ is designed to grow into a full personal health assistant, a daily-use companion that supports prevention, reflection, and care with intelligence and trust.

The company was selected as an ****Impact startup at Web Summit 2025****, recognized for its alignment with the UN Sustainable Development Goals and its commitment to advancing global health access through responsible, user-first AI. The Godly Labs team

will be available at Web Summit to meet with investors, healthcare leaders, and strategic partners.

Key Facts:

- ClaraWell is now publicly accessible through <https://www.clarawell.com>, starting with early screening tools and platform insights.
- First two tools: [ApneaRisk.com](https://apnearisk.com) and [ADHDRisk.com](https://adhdrisk.com)
- Created by Godly Labs Inc., operating across North America
- Selected for Web Summit's Impact startup category
- ClaraBrain™, developed in-house by Godly Labs, powers ClaraWell's structured health insights and forms the foundation for a scalable, continuously expanding intelligence layer across conditions and user interactions.

About ClaraWell™

ClaraWell is a patient-first digital health platform created by Godly Labs Inc. Built on structured logic and guided AI, ClaraWell helps individuals reflect on their health through accessible, condition-specific screeners that prioritize clarity and ease of use. It begins as a tool for early health awareness and is designed to evolve into a trusted, everyday health assistant. ClaraWell supports people through prevention, reflection, and personalized care, and serves as the foundation for a new kind of relationship between individuals and their health.
