PRESS RELEASE

Attendees can meet the OVHcloud team at Booth E269

OVHcloud to showcase sovereign, sustainable cloud innovation at Web Summit Vancouver

Vancouver, Canada - OVHcloud, a leading global provider of sovereign cloud solutions, will participate in Web Summit Vancouver, where it will spotlight its commitment to delivering trusted, energy-efficient cloud infrastructure for organizations of all sizes. The company will also highlight [AI Endpoints](#), its new serverless offering that brings open-source AI capabilities to developers without the complexity of managing infrastructure.

With a strong Canadian footprint since 2011, OVHcloud offers a comprehensive portfolio of IaaS and PaaS solutions tailored to the needs of digital-native companies, SaaS providers, startups, and public institutions seeking to modernize their infrastructure, scale efficiently, in a trusted, lock-in environment. Rooted in 25 years of innovation and a "sovereign by design" DNA, OVHcloud assembles its servers locally in Canada, ensuring full control over its infrastructure and providing clients with true strategic autonomy.

"We recognize the growing necessity to lower our technological dependencies to reclaim our strategic autonomy," said Estelle Azemard, VP Americas at OVHcloud. "That's why OVHcloud offers more than 80 SaaS-ready solutions that are fully interoperable and reversible, empowering companies to build, grow, and innovate without compromise."

From dedicated servers, cloud GPUs, managed Kubernetes, object storage or hosted private cloud, OVHcloud provides a complete suite that enables organizations to scale without performance bottlenecks, deploy faster with flexible infrastructure, and build resilient SaaS products on a reliable cloud.

Powering AI and innovation
As a pioneer in AI democratization, OVHcloud will also spotlight AI Endpoints, a serverless solution that lets developers easily integrate powerful open-source AI capabilities (such as chatbots, text-to-speech, and coding assistants) into their applications. With access to over 40 open-source LLMs and generative AI models, AI Endpoints enables organizations to leverage trusted AI tools-without requiring ML expertise or managing complex infrastructure.

Startups attending Web Summit are invited to explore the **OVHcloud Startup Program**, which provides up to $140,000 CAD in tech credits, personalized support, and opportunities for international growth, all in a vendor lock-in-free environment.

Whether you're a founder, CTO, and tech enthusiast, meet the OVHcloud team at **Booth E269** to discover how OVHcloud can help you grow and reclaim your independence in the cloud.

About OVHcloud

With a strong presence in Canada since 2011, OVHcloud is a global cloud player and the leading European cloud provider operating over 450,000 servers within 43 data centers across 4 continents to reach 1,6 million customers in over 140 countries. Spearheading a trusted cloud and pioneering a sustainable cloud with the best performance-price ratio, the Group has been leveraging for over 20 years an integrated model that guarantees total control of its value chain: from the design of its servers to the construction and management of its data centers, including the orchestration of its fiber-optic network. This unique approach enables OVHcloud to independently cover all the uses of its customers so they can seize the benefits of an environmentally conscious model with a frugal use of resources and a carbon footprint reaching the best ratios in the industry. OVHcloud now offers customers the latest-generation solutions combining performance, predictable pricing, and complete data sovereignty to support their unfettered growth.
